EXPERIENCE

Intern *Jun 2026 - Aug 2026*

Infosys SpringBoard Internship

- Developed a full-stack Lab Resource Utilization Platform using ReactJS, Spring Boot, and PostgreSQL.
- Built equipment booking, maintenance tracking, utilization analytics, and user management with role-based access control (RBAC).
- Containerized the application with Docker and implemented a GitHub Actions CI/CD pipeline for automated deployment on AWS.

PROJECTS

Codetrack - Online Coding Platform

ReactJS, ExpressJS, PostgreSQL, Docker, GitHub Actions

- Built a full-stack coding platform for solving coding problems, tracking submissions, and monitoring user progress.
- Integrated Piston for isolated execution of user-submitted code to secure the application against potentially unsafe code.
- Containerized with Docker and configured CI/CD with GitHub Actions for automated build and deployment on AWS.

Scoliotect - Cobb Angle Measurement Tool

Python, ReactJS, FastAPI

- Built an automated scoliosis detection application using YOLOv8, trained on 1,500 spine X-ray images.
- Implemented geometric calculations on detected vertebral keypoints to estimate Cobb angles and detect scoliosis.
- Built a FastAPI backend that loads the model once at startup and gives result through REST API.

LinkLite - URL Shortener with Analytics

ReactJS, ExpressJS, PostgreSQL, Docker, GitHub Actions

- Built a URL shortener with short-code generation, redirect API, and click count with date-wise history.
- Added login with JWT, user dashboard to manage links, and Docker Compose setup with GitHub Actions for build and deployment.
